

Electrical Parts for Forklifts

Forklift Electrical Parts - Forklifts may be particularly marked to be utilized in dangerous places. A marked lift truck indicates the design has met the minimum standards of ANSI/UL 558 used for engine powered trucks or ANSI/UL 583 used for electric lift trucks for the type of label attached.

Applications for labeled trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Areas of Use, Maintenance and Operation, and Type Designations. Consult your local insurance provider and Fire Marshall for more info concerning the permitted uses of industrial powered trucks in your application.

If the particular forklift meets the outlined criteria, labels may be attached. A labeled lift truck will show the type of designation put on the nameplate and would have a correctly corresponding label placed.
